Should you have any queries please don't hesitate to contact us

Kind Regards,

Sylwia Doligala
Work Scheduler

New sign option 1

- Battery operated
- And example can be seen driving into Aston Clinton from the Aylesbury direction.
- Cheapest speed indicator sign available. £2200 last year's price.
- Downside is that battery only lasts 7 days
- Solar powered option not viable as the panel is large and needs a stronger pole.

New sign option 2

- Widespread local use – Stone, Wing, Whitchurch
- Solar panel can fit our pole
- Last year's prices were £4229 solar version, £3649 batter version
